

JUNE 2019 SCOPE "Lite"

PARC Announcement

You are receiving this since our Scope Editor resigned because family matters make it difficult for him to ensure Scope is ready in a timely manner for monthly publication.

The club's Board decided that for the interim until a more permanent Scope preparation and distribution is established, the club will make use of our electronic delivery capability to make monthly distribution of the principal information that should be available to members.

PARC financial report

73,
Glen AI6RR
PARC Membership Chair

Repeater status

- All voice and digital repeaters are working normally. The ATV system is still down.
- Mark KF6WTN reported that Wires X was running intermittently. There were some problems with his network connection and Wires X software. Still working on it.

June Club Program

The June program will offer a historical and practical review of 3-Dimensional Printing. Mira Costa college faculty and student will offer a hands-on demonstration of the 3D printing technology, and a summary of how a 3D object is achieved from an idea.

PARC and ham radio news

1. **PARC Breakfast:** The Club Board received an interesting suggestion of creating an opportunity to form a “club breakfast” tradition. This would be a scheduled occasion for members to get together to share ham radio news and social camaraderie. The location for a regular breakfast might be fixed or rotate around San Diego county to explore unique restaurants. The events would be announced well in advance in order to allow members to determine their participation. We solicit your opinion on whether or not you would participate in such activity. Also, if you are interested in coordinating this activity, please contact a board member.

2. **Scope Editor:** A Scope editor opportunity is available. We are considering a simplified Scope, focused on timely notification for members. It will contain essential information on club finances, membership status, programs planned, and then also include articles or news of interest about local events. If any member has experience in editorial matters or similar effort and has the time available to dedicate a few hours to timely preparation of a short newsletter, please consider volunteering your service for the benefit of your fellow club members.

3. **Field Day:**

Field Day is this month! June 22-23. We did not get a volunteer to coordinate direct PARC branded Field Day activities, but our members have been invited to participate and offer manpower to several other Field Day opportunities.

- a. **W6F Field Day:** Please contact Levi **K6JO** via text or call at (760) 450-2509 to participate. The activities will be located at the West Sycamore Staging Area, found at 17160 Stonebridge Pkwy San Diego CA 92131. Please let Levi know ASAP if you want to be added to the operator roster.
 - b. **NN3V** (Charlie) is coordinating the **Poway Amateur Radio Society** (PARS) field day that will be held at Lake Poway Park. The Poway hams are hoping to attract hams who want to **operate a radio**, and plan to have radio shifts of no more than 2-hour duration. If you just want to work some contacts, or visit a location that is beautiful and fun, please contact our very own membership chair **AI6RR** (Glen) at 1-858-735-1144 for information.
4. **Events Coordinator:** The Board is looking for an "Events Coordinator"! This person would be responsible for overseeing various outreach activities throughout the year, as well as starting to organize the 2020 PARC Field Day. We want to get a jump on 2020 well in advance if possible. Please contact the Board for more information, or if you would be interested in taking on this task.
